ITEM #38
BOMA
09/11/2012

MEMORANDUM

August 23, 2012

TO: Board of Mayor and Aldermen

FROM: Paul P. Holzen, Director of Engineering
Eric S. Stuckey, City Administrator

SUBJECT: Sewer Availability Request for the Auto Clinic of Franklin located at 1810 Carters Creek Pike (Map 77 Parcel 29).

Purpose

The purpose of this memorandum is to forward to the Board of Mayor and Aldermen (BOMA) a request for Sanitary Sewer availability for the property located at 1810 Carters Creek Pike (Williamson County Map 77 Parcel 29).

Background

A request for Sanitary Sewer Availability for the Auto Clinic of Franklin (Map 77, Parcel 29) was submitted on 7-27-2012. This request is for 1 SFUEs (single family residential units). The property is located adjacent to the city limits and within the Urban Growth Boundary. The property is located in the West Basin and is located within 100' from the existing sewer line. **The property owner is requesting that this availability be denied.**

It has been the Board's policy to require properties located outside of the City limits and requesting more than 1 SFUE to also require annexation. A formal annexation request has not been presented at this time.

Financial Impact

None.

Recommendation

Staff recommends denying availability per the applicant's request.

To whom it may concern,

This letter is to verify that a preliminary soil evaluation was performed at tax map 77 parcel 29 an 8.86 acre tract off Old Carters Creek Pk. in Williamson Co. The soil on this tract was evaluated for subsurface sewage disposal possibilities for a commercial building. A large area of suitable soil was located on the side of the property in front of the old barn. The soil in this area was identified as the Armour series with estimated absorption rates of 45-60 minutes per inch. The area was approximately marked in the field with pink survey ribbons and was about 20,000 square feet. Depending on water use and building envelopes this should be adequate for a commercial building septic disposal area. This was the only suitable area of soil identified at this time. The approximate area is shown of the overhead map provided. **These findings are based on a preliminary evaluation only. Extra high intensity soil mapping, property line and easement locations will be required for final approvals.** For any questions please contact me at 615-210-5523.

Sincerely,

J. Michael Haarbauer
