

**Request for Construction Change
Change Order No. 2**

City of Franklin
 Engineering Office

 Franklin, TN 37064

Contract No. 2012-0110
 Project Hillsboro Road Improvements
 (SR 106, US-431) From New Hwy 96
 West to Independence Square

Whereas, we **Civil Constructors, Inc.** entered into an contract with the CITY OF FRANKLIN, on **December 11, 2012**, for the construction by said Contractor of the above designated contract; and Whereas, certain items of construction encountered are not covered by the original contract, we desire to submit the following additional items of construction to be performed by the Contractor and paid by the City at the prices scheduled therefore below:

Reason for Change Order:

1. Time extension due to the following issues: By request of the City, Civil Constructors Inc., was requested to allow the contractor from the 3rd Ave construction project, The Parkes Companies, access onto the Hillsboro Road project for the purpose of installing new sanitary sewer in conjunction with their project. This work was required to be in place prior to construction of the new bridge on 3rd Ave. This work was in the area of the proposed retaining wall #1 on the Hillsboro project. Civil Constructors was already in the process of excavating for the retaining wall with the 2 lanes of traffic shifted to the east side of roadway. When the sewer work began, on April 16th 2013, the traffic had to be shifted to the west constricting the work zone for the Wall #1 excavation, severely delaying progress of retaining wall #1. The importance of the wall #1 construction to the Hillsboro Road project is the fact that it was a controlling item of work for project completion, the wall had to be built so the construction of the proposed underground utilities could begin and road work to follow that. The Parkes Companies finished the sewer work and the traffic shift was removed on June 18th 2013, a total of 64 days. In addition to this delay, during construction of the AT&T duct bank it was discovered that the required number of existing conduits to complete the work were not in place at the Hillsboro Rd./Del Rio Pike intersection. This resulted in exploratory and new work in order to provide adequate conduits for AT&T to complete their new line installation. It is agreed due to the unforeseen delays described herein, to extend the number of calendar days allowed to complete this project by a total of 56 days from 455 to 519 days. This time extension changes the date of completion of all work, from May 12, 2014 to **July 7, 2014**.
2. Additional traffic control required due to the extension of calendar days on the project. The lump sum payment for traffic control is defined by spec. as follows: Full compensation for furnishing flaggers, traffic cones and etc...
