MEMORANDUM

August 31, 2011

TO: Board of Mayor and Aldermen

FROM: Eric Stuckey; City Administrator 
Kevin E. Comstock; ITS Project Manager
Eric Gardner; P.E. Director of Engineering
David Parker; P.E. CIP Executive/ City Engineer

SUBJECT: Authorization on to Purchase 34 TS-3 Digi Port servers through Insight Public Sector Government Services Contract for the Franklin ITS Project.

Purpose

The purpose of this memorandum is to provide the Board of Mayor and Aldermen (BOMA) with information to consider the purchase of port servers for Franklin's Traffic Operations Center (TOC) Intelligent Traffic System (ITS) project funded by the American Recovery and Reinvestment Act (ARRA).

Background

The Municipal Information Technology (MIT) Department and TOC have worked in a cooperative manner for over 3 years in the joint use of each department's fiber optic networks. That effort has allowed the City to expand the ITS System and provided MIT with much needed infrastructure in the field at critical locations. As the Franklin ITS ARRA project nears completion in the Cool Springs area, the need was jointly identified by MIT and TOC staff to install 10 GigE Switches at key locations along the system to maximize the use of a single fiber pair. The final component in that installed network is the interface between the network and the signal equipment or CCTV equipment at each of the 34 locations.

Staff has identified Insight as a Government Services Vendor where the City may purchase the needed equipment off an approved GSA contract.

Financial Impact

This project would be 100% funded by TOC budget authorized by BOMA for FY 2011-2012 under Machinery and Equipment over \$10,000, specifically called out as Traffic Signal Upgrades.

A quote of \$10,484.04 for the procurement of 34 Digi Port servers TS-2 @ \$319.06 has been provided by Insight Public Sector. (See Attachment A)

Recommendation

Approval of the purchase in an amount not to exceed \$10,484.04 is recommended.
