MEMORANDUM

October 1, 2011

TO: Board of Mayor and Aldermen

FROM: Kevin E. Comstock; ITS Project Manager
Eric Gardner, P.E. Director of Engineering
Eric S. Stuckey, City Administrator

SUBJECT: Consideration of the Procurement of Eight (8) Environmentally Controlled Ethernet Switch Cabinets for the Franklin ITS Projects.

Purpose

The purpose of this memorandum is to provide the Board of Mayor and Aldermen (BOMA) with information regarding authorization to procure environmentally controlled cabinets for the 10 Gig Ethernet Back-haul Switches necessary for the full deployment of the joint MIT/TOC fiber optic communications network.

Background

The City's Municipal Information Technology (MIT) and the Traffic Operations Center (TOC) have worked in a cooperative manner for over 3 years in the joint use of each department's fiber optic networks. That effort has allowed the City to expand the Intelligent Traffic System (ITS) and provided MIT with much needed infrastructure in the field at critical locations. Both the Franklin ITS/ARRA Project and the upcoming TOC Phase 3 Infrastructure and Upgrades Project require the use of these environmentally controlled cabinets. This need was jointly identified by MIT and TOC staff to install 10 Gig Ethernet Switches at key locations along the system to maximize the use of a single fiber pair and enhance overall network operation. MIT and TOC have identified the 8 locations for these installations and are requesting authorization for their procurement with installation to be completed by Streets Department Traffic Division.

Staff was unable to obtain 3 quotes from suppliers of these units. We have obtained 2 quotes with the following results:

Vendor	Description	Unit Price	Shipping	Extended Price
Purcell Systems, Spokane, WA	RAC24 w/ 2K A/C	\$2,782.00	\$471.58	\$22,727.58
Temple Inc. ; Decatur, AL	NEMA Cab w/ 4K A/C	\$3,600.00	\$850.00	\$29,650.00

Financial Impact

This project would be 100% funded by TOC budget authorized by BOMA for FY 2011-2012 under Machinery and Equipment over \$10,000, specifically called out as Traffic Signal Upgrades.

An Engineering Opinion of Probable Costs indicates approximately \$22,727.58 for the procurement of the necessary equipment.

Recommendation

Staff recommends authorization to proceed with the purchase of the Purcell Systems units.
